Mines and Mining Stocks

IMLAY MINE'S

Judge Powers Is Greatly Impressed With Disclosures Made at Property.

President George W. Morgan and Judge O. Powers of the Imlay company returned yesterday morning from pany returned yesterday morning from a trip of inspection to the company's mines in Humboldt county, Nevada. While Mr. Morgan makes frequent trips to the property, it is nearly eighteen months since Judge Powers was last at camp. That the changes which have taken place in that time were always and in the judge says, is coming from points on and above the judge out of the Bingham Central-Standard properties, the local mining stock market showed signs of topheaviness on Friday and it would have surprised no one had it would

field with a genuine mine. to get used to it; it is hard to believe that such is really the case, though and indisputable. There is over a carstation and two more at the mine waiting to be hauled. Up to this time the

of Paine, Webber & Co., Boston, together ings in every one of them, the work

Boston, April 25 .- We want to express again the importance of the recent bond the one that is now making the mine. issues and the outlook it makes for the indusrials and coppers. Amalgamated Copper has lagged on the movement, but will probably be taken in hand next week. It will move much faster between 60 and 70 than it did between 50 and 60. North Butte, Butte Coalition and Copper Range are the favorites in Boston. We strongly advise the exchange of Tamarack for eith er Copper Range or North Butte.

Pope-Hartford Automobile perfection at an Ideal Goldfield Con.

Price

\$2,750

We say without hesitation that the 1908 POPE-HARTFORD car is not only far and away superior from every standpoint of quality and quantity to any car selling at less than \$3,000, but fully equal in performance to the best car built in America, irrespective of price or class.

This is a strong statement to make of a car selling, completely equipped, for only \$2,750, but anyone who is sufficiently interested to thoroughly investigate the unsurpassed record of the Pope-Hartford must acknowledge that any claims we make for the car are warranted by its own right of actual conquest and its own achievements. First carload will arrive Monday.

Tom Botterill Automobile Co. 62-64 West Third South St. Dealers in High-Grade Motor Cars.

the company team could do it. Coal would be hauled to the mine and ore loaded back, but I understand that other teams will soon be secured and the ore will be moved faster. Superintendent Turner says he is now ready to send out a carload a week and, judging from the appearance of the mine, I should say he will have no trouble in

doing that, with haulage facilities." showing in the property, Judge Powers states that the one thing which impressed him was the workmanlike manner in which the mine had been opened and the splendid machinery and equipment with which the property Judge O. Powers of the Imlay com- had been provided. Most of the ore now ebing mined, the judge says, is

that at last I am really identi- feet of \$10 ore has been passed through The and fifteen feet beyond the face of the experience is one with which I drift is now entering the high-grade have been such a total stranger mineral zone that goes with the white during my career that it is hard quartz. In the south drift on the same level one-third of the face was in highgrade ore when he left the mine, and the evidence appears to be conclusive the superintendent expressed the opinion that it would be only a few days load of fine ore now at the railroad till he would have a great body of rich ore opened there.

Judge Powers says that connections with the old incline workings and the new shaft have been made, and that the mine is so well kept up that it looks like business to inspect any portion of it. While the company owns thirtyfive claims, with rich mineral showof Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Poliock & Co., and from which it is secured for use in this department of The Herald:

Ings in every one of them, the work done to date has only developed ore in one. What will happen when the campaign of development is broadened and other claims are made to disclose their riches can only be imagined, but the management of the company is sanguine that many other claims will be guine that many other claims will be found just as rich, if not richer, than

SILVER A BAD ACTOR

Silver has dropped back 11/2c per ounce during the past week, the quotation yes-terday being 53½c. It has not been that low since the 31st day of December last, to break the market. If intrinsic merit low since the 31st day of December last, when it was quoted at the same price. On Dec. 27 it was quoted at 52½c. The highest point the metal has attained this year was on Jan. 7. when it was quoted at 58%c. The day before it was selling at 55%c, the sudden jump, which was only temporary, being caused by short covering in London. Three days later it was down to 54%c. On the 19th of February it touched 57%c, but it has not been anywhere near that level since the middle of February. of February.

For the past several weeks there has been very little buying by the government for subsidiary coinage purposes and there is nothing in the situation, either cate that high er prices will come in the near future.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$55,000, as follows: Silver, lead, gold and copper ores, \$10,000; base bullion, \$45,000. Settlements for the week aggregated \$289,000.

Metal Market.

Silver, 53½c per ounce. Copper (cathodes), 129-16c per pound. Lead, \$4 per 100 pounds.

Aside from the remarkably fine ore Hundred-Pound Chunks of Ore Give Idea of Strike in Central-Standard.

> If you are looking for evidence of the character of ore that is now being

will be made to ship from it as long as the market for the red metal holds so low. The ore in this vein averages better than 12 per cent copper, and is an asset that will be made to contribute liberally to dividend earnings by

and by. The tunnel is being pushed ahead for the ledges that have proved so highly productive in old workings near the surface in the past, and it will not be any weeks till connections are made with the first of these. A short time ago, when the ledge was struck from which fine ore is now being mined, the statement was made that Bingham Central-Standard and Bingham Standard Copper stocks were worth more money than they were selling for. In the language of the gambler, the talent "cop-pered the bet" and put the price back a few cents a share, probably for the purpose of trying to shake out some DURING THE WEEK cheap stock. Holders refused to be caught, however, and now that a camcheap stock. Holders refused to be paign of production is to be inaugurated, everybody is hustling to get the is going to count for anything, Bingham Central-Standard, which holds control of Bingham Central and Bingham Standard stocks, will soon be selling at \$1, and Standard will go to 50c.

RAWHIDE WILLING TO TAKE FIFTY-DOLLAR ORE NOW

Rawhide, Nev., April 24.—A. W. Coote, of the Firm of Codd & Co. of Goldfield, owners of the Last Chance hill in Rawhide, is at present in Boston, from which with a large eastern brokerage house which places that company on a sound financial footing. Probably no part of financial footing. Probably no part of the Rawhide district presents a busier aspect than does Last Chance hill. Seven leases are working actively and no seven leases in the district have brighter prospects than those on the Codd & Coote property. A. W. Scott, a well known mining man of Africa, Mexico and latterly of the Cobait company, is spending thousands of dollars in sinking a shaft, cross-cutting and drifting on the old Morcross-cutting and drifting on the old Morrissey lease, which he purchased some six weeks ago. It is apparent that the whole hill is a mass of milling ore intermixed with small seams of high grade. company work by the Red Top Mining company on the block of ground recently taken over from the Red Top Leasing & Mining company is progressing rapidly, the shaft having arrived at a depth of 100 feet. At the seventy-foot level the character of the ground indicated close proximity to an ore body. At the ninety-foot level this ore body was encountered, a ledge four feet in width giving assay proximity to an ore body. At the proximity to an ore body was encountered, a ledge four feet in width giving assay returns of \$15 to the ton. It is the intention of the Red Top company, which is controlled by W. F. Bond & Co., of San Francisco, to drift on this ledge from the 100-foot level, and this company should in the very near future become one of the regular producers of the camp.

lum Leasing & Mining company, which is operating a block on Zeb Kendall's Bluff claim adjoining the Last Chance, is in Los Angeles, and reports that he has been successful in financing this company to an extent which will enable it pany to an extent which will enable to to crowd development to a finish. At the 100-foot level a shaft is passing through a body of \$50 ore and a station has been cut at this point with the object in view of drifting on this ore body to determine its full extent.

Work was started this week on the plant of the Rawhide Water & Power company. The force of men have been digging the trench from the supply line that is to connect the reservoir on Balloon hill with the principal service main on Nevada street. As soon as this work is completed the masons will begin work at the reservoir site. Superintendent Cheney says that the mains streets of Rawhide will be electrically lighted within a

DOINGS OF UNLISTED STOCKS ON EXCHANGE

Bingham Standard Copper and Bingham Central Standard moved up a few pegs yesterday. The former sold at 24c and the latter at 41c and 42c, with 45c bid later the latter at 41c and 42c, with 45c bid later and no stock coming out. Cedar was strong at 9½c and so was Thompson at 22c and 22½c. Ohio Copper weakened again and sold at \$2.40 and \$2.42½. East Crown Point continued to sell at 2c and East Tintic Consolidated went at 5c. The only other participant in the trading was Uintah Treasure Hill, which brought from 22c to 22½c per share.

Mason Valley was quoted at \$1.20 bid, Newhouse at \$7 at \$7.75 and Ohio Kentucky at \$2.02½ bid, with 5c offered for Weimer Copper without offerings.

BATTLE MOUNTAIN MINE IS MAKING FINE SHOWING

G. Mart Corns, general manager and superintendent of the Pedro, came down from the mine Tuesday evening with glowing reports of the development of the property, says the Battle Mountain Her-

He states that the east drift is now in He states that the east drift is now in 165 feet on the ore shoot with good ore all the way. The face of the drift is in shipping ore of the same grade as has been broken down during the past four days. The ore is partially oxidized and about one-third of the values are free. No assay returns have been received yet, but a good string of gold shows up in the

The property has been visited by a large number of mining men during the past two weeks and without exception they all say that there is no question about the Pedro. It is bound to make a big producing mine

Mining Notes.

The Utah Mine of Fish Springs was in the market with a carload of ore yesterday that netted close to \$3,000. Manager George H. Dern of the Con-solidated Mercur was in from camp yes Ophir, at Stateline, is up from camp to make settlement for a carload of fine ore that is due at the sampler now. A bill of lading for two cars of May Day ore reached the company's offices yesterday morning. This is the first con-signment since work was resumed at the mine the first of the week.

Many Properties Ready to Supply Smelters With Heavy Tonnage of Ore.

PRINCE IS TWO MINES IN ON NEW AND RICH LEDGE OPENED

IN THE DAY MINE.

Five or six big mines in the camp of Pioche, Nev., and thet district surhave taken place in that time were almost bewildering to him, the judge frankly admitted.

"I am almost afraid to talk about it," and almost afraid to talk about it, and almost afraid to talk about it. The ore carries splendid values in lead and silver, with about 5 per cent copper and some gold. Drifts both ways from the point where the tunnel cut the vein are now being crowded along, and ore is being mined for shipment from each drift. Fifty feet back of this ledge a remarkably strong consolidation and particularly if prices of the smelters, other than the trust works, are ready to receive ores in quantity, and it is just as well that such is the case, because that will allow more time for the price of metals to recover some. Brokers who understand conditions because that stocks ought to be bought to be defined and some others that are ready to car way be mentioned the Nevada-Utah, the Prince Consolidated, the Ohio-Kentucky, the Mendah, Boston, Pi-Brokers who understand conditions because that stocks ought to be bought to be bought to be bought to be bought to be a price of the smelters, other than the trust works, are ready to receive ores in quantity, and the Prince Consolidated, the Ohio-Kentucky, the Mendah, Boston, Pi-Brokers who understand conditions because that stocks ought to be bought to be bought to be bought to be bought to be a price of the smelters, other than the trust works, are ready to receive ores in quantity, and the Prince Consolidated, the Ohio-Kentucky, the Mendah, Boston, Pi-Brokers who understand conditions because that will allow more time for the price of metals to recover some. Brokers who understand conditions because that will allow more time for the price of metals to recover some. Brokers who understand conditions because that will allow more time for the price of metals to recover some. Brokers who understand conditions because that will allow more time for the price of metals to recover some. Brokers who understand conditions because that will allow more time for the price of the smellers, other than the trust works, and the price of per vein has been opened, but no effort recede at all from the present level.

been directed to the fact that this old camp was going to boom, and it can be said now that every minute durin the past year has been fruitful of de veloping ore bodies, the extent and richness of which are little appreciate ed by the outside world.

Prince Is Two Mines in One.

Probably the most sensational discovery that has recently been made in the camp has been the opening of an entirely new vein in the Prince Con-solidated, mention of which was made a couple of weeks ago. The main, ledge is this remarkable property is more than 150 feet wide, and it has been opened and developed to a depth of 400 feet. It has been demonstrated that every pound of ore in this monster ledge, owing to its remarkable fluxing qualities, will pay handsomely to smelt, while through the mass are great ribs of ore that, in silver and lead values, are entitled to be classed as high grade. This ledge is filled with a heavy, black sulphide ore, with an iron-manganese base, and its extent is such that, when the time comes, the company will be able to "glory-hole" mine it with steam shovels, if it is considered desirable to do it that way.

But the new strike. Anthony H. Godbe, one of the head men of the company, says it is of sufficient importance to justify the declaration that it will make a big bonanza mine in itself. The ledge is several feet wide on the 300-foot level of the property, where it was accidentally discovered through having a cross-cut run into the footwall country for the purdemonstrating whether the main ledge was not encased with a thirty feet, or twice the distance or-dered, and the ledge was opened. It was found to carry a rich yellow chloride ore, samples of which show all the way from a few hundred up to more than 2,000 ounces of silver per ton. After the discovery was made surface prospecting disclosed the fact that the ledge was the same as one that was mined in the early days to shallow depth, and which produced a fortune. In selecting a place to sink a deep shaft, the early-day owners got off of this ledge and started down within the limits of the big black ledge, where the ore was different and not rich enough to mine then. It was then believed that the character of the ore had changed, and work ceased. Mr. Godbe states that this vein will be opened on the 200 and 400-foot levels within another month. It has been nearly reached on the 200 level now, but more time will be required on the 400, as the main ledge has to be crosscut from the hanging wall side to reach it. Mr. Godbe believes the new

ledge will produce millions in rich ore. New Strike in Day Mine.

"I learned while at camp," said Mr. Godbe vesterday, "that an entirely new vein has also been opened up in the Day mine, at Jackrabbit, one of the big properties of the Nevada-Utah company. There has been nothing re-leased concerning this discovery, but I understand that the ledge is a big one Colorado—200@\$4.20, buyer 60. Iron Blossom—4,500@45½c; 3,000@46½c, buyer 60; 1,000@46c; 1,000@47c.

understand that the ledge is a big one and that the ores are richer than anything ever found in the Day mine. thing ever found in the Day mine Bodies of rich ore, I understand, have also been opened up by the management in the Raymond & Ely and Meadow Valley mines of the company, while the Boston-Pioche and the Mendah are also in line for making a record that will attract a great deal of attention. The Ohio-Kentucky, of course, is opening up more ore than it will know what to do with for years to come, even though a smelter is built at camp to accommodate it, and there is no question but what smelt-ing works will be provided for the district one of these days.'

MAIDEN DEAL AT GRANITE IS MADE FOR \$500 CASH

terest in the Backnumber group of claims for a cash consideration of \$500, the deed for which was filed with the county re-corder yesterday afternoon, says the Ely Expositor.

The claims are located near the prop-

id, signment since work was resumed at the mine the first of the week.

John Dern, general manager of the Uncle Sam, Lower Mammoth and May Day properties, accompanied by Mrs. Dern and his daughter, Mrs. W. H. Cunningham, will leave for the east and Europe on a four mouths' trip today. Mr. Dern will stop a couple of days in Nebraska, then a couple of days in Boston and New York, looking after his various business interests. The party will sail on the 6th of May for Amsterdam.

F. A. Jeffs, a brother of L. A. Jeffs, who is under treatment at St. Mark's hospital for an injured leg, arrived from Rockland, Mich., yesterday morning. Like all the folks back home, he was anxious to know just what had happened to his brother and just how he was getting along, so he packed his grip and came to see. He will probably remain several days. L. A. Jeffs, the patient, is getting along first rate, but it will be some little time till he is able to get around as of yore, as the knee is affected.

Expositor.

The claims are located near the property of the White Pine Mining company in Gold canyon, four miles north of the town of Blaine, and a great deal of development work has been done upon them within the past year.

While there has been no phenomenal strikes made in the Granite district recently, yet development of the mines upon which work is being prosecuted is resulting most satisfactorily for the owners.

The mill at the Campbell ranch is still being kept pounding away on ore from the Alvin mine, which is returning better than \$100 per ton from the plates.

The leasers on the Buster are continuing the sinking of the shaft to greater death in mine, which is returning better than \$100 per ton from the plates.

The leasers on the Buster are continuing the sinking of the shaft to greater death in the sinking of the shaft to greater death to greater death to the property and many hundred tons of free milling ore is on the dump at this property and many on ore from the plates.

Many hundred tons of free milling ore is on the dump at this property and many more hundred tons in sight in the mine.

A. B. Colwell of the firm of Haff & Colwell, civil engineers, returned last night from the district where he had been for the past few days engaged in surveying the Grace Gold group. He reports that the district is one of the most promising for the making of good gold mines that he has seen for some time, being espehe has seen for some time, being especially well pleased with the showing on the Alvin mine, which adjoins the group upon which he was engaged in doing the stryeying.

more in the district, came in last night to secure provisions, and report that they have secured a group of claims just north of the Blaine mine, upon which there is a good strong ledge of gold carrying quartz. samples from which show plenty of gold in the pan. They will return in a few days o begin development work upon thes

SEVEN TROUGHS GOLD COIN READY FOR BUSINESS

Manager Ed Sherard of the recently or ganized Seven Troughs Gold Coin Mining company stated yesterday that all arrangements had been made and that work on the company's nine claims in the Seven Troughs district would be commenced at once.

The company expects, after driving the proposed tunnel 125 feet, to cut a ledge which, on the surface, has given very encouraging results. An additional 150 feet will cut the Wild Bull ledge, which, in a seventy-five-foot shaft, is said to have opened up two feet of ore some of which will run as high at \$2,000 a ton in gold and silver. Mr. Sherard will leave for camp early in the week to inaugurate the campaign of development that has been decided upon.
